Printer Driver Manual
Mac OS x

Introduction

This printer driver supports Mac OS X v10.5 or higher on Intel Macs.

1. Installing /Registering /Delete Printer Drivers

1.1 Installing Printer Drivers

To install the driver, proceed as follows.

1. Place the xxx.pkg file downloaded via the website or other methods on your desktop or home directory in Mac and expand it by double-clicking on the file.
2. The screen below is displayed.

Double-click<xxx.pkg> to begin the installation.

3. The following windows is displayed.

Click [Continue].

4. Click [Install] to start the installation.

5. If the confirmation window shown below is displayed, enter the user name and password having administrator rights, then click [OK]

6. The installation ends successfully.

When the installation has ended successfully, the window shown below is displayed.

Click [Close].

1.2. Registering the Printer

1. In the Apple mark in the menu bar, open [System Preferences] and double-click on the [Print & Fax] icon.

2. Connect the printer, and then turn on the printer's power switch.

The Plug and Play feature detects the connection of the printer hardware and automatically installs the driver software.

3. Click [+] to install the printer driver.

4. Select the USB printer created using plug-and-play from the "Default Browser," make

the following settings and click [Add].

Name: Arbitrary character string (change the name from the name of the receipt driver displayed.)

Print Using: Select the driver to use....(Select a driver to use...)

5. If the name of the specified printer is added to the printer list, the printer has been added.

If necessary, return to #3 above and added all the required printer drivers.

2. Setting the Printer Functions

Notes: The method of setting the printer functions under different Mac OS may be different.

Use the dialog box opened by [File]->[Print] in the Mac OS X menu.

From the "Printer:" pull-down menu, select the printer name to set, the click[▼] to display the details.

Select "Printer Features" from the setting pull-down menu.

"Feature Sets:" Selects function that make settings.

There are these settings: Page Type, Media Type, OutMode, Darkness, ImageControl, Mirror, when select "Printer Features 1".

3. Setting the Paper Size

Notes: The method of setting the paper size under different Mac OS may be different.

With OS 10.5 from the menu bar on Mac OS X, open [File]->[Page Setup].

Select the paper size from the Paper Size pull-down menu.

4. Appendix

4.1 OS 10.11 and above version of the installation of the printer driver need to close the rootless.

The purpose of Rootless design is to protect the security of system files stored in the root directory.

You need to close the rootless before install the printer driver, enter the administrator password, restart the computer, install the printer driver, open rootless.

Method of closing rootless: `csrutil disable`;

Method for activating Rootless: `csrutil enable`;

Query Rootless protection status: `csrutil status`.
